Wall Mount Sliding Door Hardware

Wall Mounted Sliding Door Hardware is ideally suited for applications where it is cost prohibitive or structurally impossible to install a pocket door. Installation is relatively straightforward and can be performed with minimal expertise. The track system can be covered and trimmed out by the installer to match other doors or millwork in the project. Note: See www.bbwood.com for installation instructions.

Single Wall Mount Sliding Door

Converging Wall Mount Sliding Doors

2610 SERIES: Minimum Door Thickness: 1-1/8”  Maximum Door Weight: 300 lbs. per door.

The 2610 is a commercial grade wall mounted sliding door hardware set designed for fast installation. Precision extruded aluminum box track features a built-in fascia that hides the sliding hardware from view. Strong 3-wheel hangers are completely adjustable Bronze series has ball bearing wheels for doors up to 200 lbs. Zinc series for doors up to 125 lbs. Bronze features an extruded architectural grade dark bronze anodized track.

Kits Include: Track, hangers, guides, brackets and end stops.

Stocked in two sizes. Track can be cut on the job for smaller openings. Hangers are available separately when two doors are used in one opening.

200WM SERIES: Minimum Door Thickness: 1-1/8”  Maximum Door Weight: 300 lbs. per door.

The 200WM is a commercial grade wall mounted sliding door hardware system designed to carry heavy doors. The 200WM Hardware Set features heavy-duty extruded aluminum I-beam track, heavy-duty track mounting brackets and strong four wheel adjustable hangers with machine turned ball bearing wheels. 11-13 gauge zinc dichromate plated steel parts. Brackets (2006) should align with wall studs. End brackets within 8” of end of track. Fascia is an option in Bronze or Satin.

Kits Include: Track, hangers, guides, brackets and end stops.

Stocked in two sizes. Track can be cut on the job for smaller openings. Call for quote on track up to 16’.

Hangers are available separately when two doors are used in one opening.

Note: Spade & Fleur-de-Lis are a hand made forged, hammered finish. All other products are machined stamped.

Series 3: Items with an *also available in Barn Red - Use ORB price.
Opening greater than 8’?
Add track & purchase a splice kit and additional wall brackets.

Wall Mount Bracket:  Recommend 16” spacing. Gap between the wall and the door: Subtract door thickness from 2-1/2”.
For a “Short Bracket” for thin doors (Subtract door thickness from 1-7/8 ”)
To order the short bracket change the “0” in the model number to a “1”.
Example: A 6’ long Series-2 would be a RS216

Adjustable Center Guide:  Spade & Fleur-de-Lis kits come with matching center guides. All other kits include the domed center guide. Guides are adjustable for door thickness.

Roller Center Guide:  Optional rolling guide for doors with rough surfaces, such as reclaimed wood or rustic finishes. Constructed of heavy duty black Delron polymer and includes mounting bolt.

Door Stops:  Door stops with black rubber bumpers prevent damage to your door. Spade & Fleur-de-Lis kits come with matching stops. All other kits include the domed stop.

Track End Stop:  Button end stop included. Ball end stop optional.

Double Door Stop:  DD402
Kits include 78 ¾" track with stops, 4-Mounting Brackets, 1-Floor Glide, Fasteners
Optional Splice Kit available for Double Units

Rated for 250 lbs.
Decorative Barn Hardware - Flat Track

Flat Track Interior Kits

The wheels are made up of high density PVC for a quieter and smoother rolling door. The rails and brackets are made out of sturdy extruded aluminum, making them light weight but strong. The aluminum has a powder-coated black* finish, Rated for 250 lbs. Up to 1-1/2" thick doors.

- Made in the USA
- Powder coated components
- 3” & 5” diameter PVC wheel
- Kits include Aluminum rails, hangers, stops, guide, and all fasteners
- Interior Use Only

Available in 4’, 6’ and 8’ Tracks

Optional Splice Kit for Track

*Now available in a Rust finish.

New - RTM top mount hanger for flat track system.

Gap between the wall (or surface where the brackets are mounted) and the door = 1-15/16” minus door thickness.

Height of door + desired gap at bottom +1-1/8" = Center of Rail

RSB package of hardware shown above.
